

Okay, this is going to be a comment and suggestions about the webpages ...we like what we see but we have few notes.

- 1- The blue color is nice even the gold is okay I love it to be more than this but for now, it's okay.
- 2- No need for the drop-down menu on the core plans.
- 3- Why It's not suited for tablets or phones? Is it too early?

- 4- The plans should not show any detail of the plans more like fundrise + the graphics need to be refined or maybe something flag icon nice kind of thing.
- 5- We are adding a text (few lines before the core plans).
- 6- Why us look really pleased with it keep in mind we are adding 3 more points or takeaways
- 7- How it works going to be other text maybe * signup * fund * earn (I'm working on it)
- 8- Message from the president it could be deleted (I'll make my mind on it)
- 9- The footer of the page looks fantastic plenty of rooms to add or remove whatever needed
- 10- The core plans page if you are not a client you can't see the plans, they have to register first to be able to view it.
- 11- I like the FAQ page we could add square or remove one we will find out (working on the content)
- 12- About us page we like the 2 columns looks nice... it should be followed by mission statement after the banner and journey (I'll supply the content) the team going to be incorporated in other way we'll talk about it .
- 13- Contact us nice and simple.
- 14- Missing the Referral page tap at the top of the page

This is our feedback and we can talk more to get our ideas mirror your creation.
